INTRODUCTION

The Arkansas Department of Health, through its Division of Vital Records, is charged with the registration of certificates of birth, death, marriage and divorce. These records are the primary source of the data contained in this report.

All current vital events received by the Division of Vital Records by March 31 of the following year are included in this annual presentation. Few records are received after this date and their absence does not affect the statistical validity of data contained in this report.

The out-of-state occurrences to Arkansas residents have been incorporated into the birth, death, fetal death and induced abortion data. Out-of-state spontaneous abortions are not included in these data reports. The Annual Reports published for the years 1970-1977 did not include data on events occurring in other states to Arkansas residents. Due to the nature of the reporting procedure, divorces are shown by county of occurrence only. Marriages are reported by county of issue of license and not by county of occurrence or residence.

The population data used for denominators in computing rates for the state and county summaries for 1985 are estimates compiled by the Bureau of the Census.

Some additional data are available that are not published on an annual basis because of the specific nature of the statistics. The Division of Health Statistics will be glad to consider requests for such specific data. Please address all requests to:

DEFINITIONS

AGE - Age in years as of last birthday. For infants, age may be stated in days, weeks or months.

ANNULMENT - Legal invalidation or voiding of a marriage, which confers on the parties the status of never having been married to each other.

DEATH - Permanent disappearance of any evidence of life at any time after live birth.

DIVORCE - Final legal dissolution of a marriage.

FETAL DEATHS (STILLBIRTHS) - Death prior to the complete expulsion or extraction from its mother of a product of human conception, with 20 weeks or more gestation and/or weighing 500 grams or more; the death is indicated by the fact that after such expulsion or extraction the fetus does not breathe or show any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles. (This definition was effective with the 1983 events.)

INDUCED ABORTION (Induced termination of pregnancy) - Intentional termination of pregnancy with the intention other than to produce a liveborn infant or to remove a dead fetus.

INFANT DEATH - Death of an individual under one year of age.

LIVE BIRTH - Complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy, which, after such expulsion or extraction, breathes or shows any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached.

LOW BIRTH WEIGHT BIRTH - Any liveborn infant whose birth weight is under 2500 grams (5 1/2 pounds).

MARRIAGE - Legal union of persons of opposite sex.

MATERNAL DEATH - Death attributable to delivery or the complications of pregnancy, childbirth or the puerperium.

NEONATAL DEATH - Death occurring to an individual less than 28 days of age.

OCCURRENCE, PLACE OF - Place (city, county or state) where the event occurred.

RACE - Recorded as the individual states on certificate for mother, father, decedent, couple being married or divorced. Race of live birth is determined by race of parents.

RESIDENCE, PLACE OF - Usual place of residence. For births and fetal deaths, usual place of residence of mother is used. May be different than mailing address.

SPONTANEOUS ABORTION (MISCARRIAGE) - Termination of pregnancy through natural causes and without the aid of mechanical or medicinal agents, with the duration of pregnancy being less than 20 weeks gestation and/or weighing less than 500 grams. (This definition was effective with the 1983 events.)

UNDERLYING CAUSE OF DEATH - Disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury. The cause of death codes used in this report are from the International Classification of Diseases, 9th Edition (ICD-9), as approved by the World Health Organization.

WEEKS GESTATION - The period of gestation (length of pregnancy) is the number of completed weeks elapsed between the first day of the last menstrual period and the date of delivery or termination.

GENERAL SUMMARIES

DIVISION OF HEALTH STATISTICS AND EPIDEMIOLOGY
ARKANSAS DEPARTMENT OF HEALTH

1985 ARKANSAS VITAL STATISTICS: A REVIEW

BIRTHS

* There were 35,164 births to Arkansas residents in 1985.

  This gives an Arkansas birth rate of 14.9, compared to a U.S. rate of 15.7.

  About one out of every five births (6,703) were to mothers 19 and under.

* More than one out of five births were to unmarried women (7,872).

  Over half (5,048 out of 8,475) of the nonwhite, and almost one tenth (2,824 out of 26,689) of the white births were to unmarried women.

  Fifty percent of the teenage births were to unmarried teenagers.

* Approximately 7.5% (2,634) of the total births were low birthweight (under 2,500 grams).

  The percentage of low birthweight births for nonwhite was 11.8, compared to 6.1 for white.

* Birth defects were reported on the birth certificates of 319 (less than 1%) newborns.

  Musculoskeletal anomalies were the most common, with 123 reported defects.

FETAL DEATHS AND ABORTIONS

Prior to 1981, some spontaneous abortions (miscarriages) were being reported on Fetal Death (Stillbirth) certificates. During 1981, the reporting criteria for spontaneous abortions and fetal deaths were changed to comply with the new Vital Statistics Act of 1981. This Act required spontaneous fetal deaths of under 1,000 grams or 28 weeks gestation to be reported as spontaneous abortions. In 1983 the law was amended to require fetal death certificates for fetal deaths of 20 weeks gestation or weighing more than 500 grams. Thus, 1981 - 1983 spontaneous abortion and fetal death data are not directly comparable to data of previous years.

* Arkansas had 1,111 reported spontaneous abortions (miscarriages) and 295 fetal deaths (stillbirths).

  One hundred and nine stillbirths resulted from "Complications of the placenta, umbilical cord or membranes", which was the most common cause.

  The stillbirth rate (per thousand live births + stillbirths) was higher for nonwhite (12.6) than for white (7.0).

* There were 6,378 induced abortions to Arkansas residents this year.

  A total of 2,015 were to women 19 and under, 120 of whom were 14 and under.

INFANT DEATHS

* The Arkansas infant mortality rate was 11.7, while the U.S. rate was 10.6

  Nonwhite Arkansans had an infant mortality rate of 14.4, compared to a white rate of 10.9.

* Of the 412 Arkansans who died before their first birthday, over half (250) were less than 28 days old.

* "Congenital Anomalies" (birth defects) was the leading cause of infant deaths, claiming 80.

  "Sudden Infant Death Syndrome" was second with 63 deaths, and "respiratory distress syndrome" was third with 39 deaths, and "other respiratory conditions of the newborn" was fourth with 34 deaths.

DEATHS

* In 1985, 24,125 Arkansas residents died.

  The Arkansas death rate was 10.2, while the U.S. death rate was 8.7.

* The leading cause of death in Arkansas in 1985 was heart disease, which took 9,023 lives.

  Cancer, second, caused 5,035 deaths; cerebrovascular disease was third with 2,070 deaths.

* Accidents, the fourth leading cause of death for Arkansans, took 1,207 lives.

  Accidents accounted for nearly half of the deaths for ages 1 - 34.

MARRIAGES AND DIVORCES

* There were 31,663 marriages performed and 16,528 divorces finalized in 1984.

  The Arkansas marriage rate was 13.4, compared to a U.S. rate of 10.2.

  The divorce rate was 7.0 for Arkansas and 5.0 for the U.S.

For explanation of rates and ratios, see "Formulas" on page iii.

ARKANSAS VITAL STATISTICS 1985

BIRTHS

DIVISION OF HEALTH STATISTICS AND EPIDEMIOLOGY
ARKANSAS DEPARTMENT OF HEALTH

Births for 1976, 1978, 1979, and 1980 have been revised using National Center for Health Statistics data in lieu of previously published Health Department tabulations. Because of past errors in compiling births by county of residence within the agency, NCHS data are being used for these years. The major differences are in Benton and Boone counties.
